Cynthia S. Froning

Statement

I am an astronomical observer and instrumentalist. I specialize in the development of ultraviolet, optical, and near-infrared cameras and spectrographs for ground- and space-based telescopes and enabling technologies for future instruments. I use multiwavelength observations to address a number of research questions, with a particular interest in the physics of accretion disks and outflows in X-ray binary systems and the energetic properties and habitability of low mass exoplanet systems.

Recent Employment History

University Affiliate Research Fellow

2013–present Department of Astronomy
University of Texas, Austin, TX

Associate Director

2011–2013 Center for Astrophysics and Space Astronomy
University of Colorado, Boulder, CO

Assistant Research Professor

2009–2013 Department of Astrophysical and Planetary Sciences,
University of Colorado

Research Associate

2002–2013 Center for Astrophysics and Space Astronomy,
University of Colorado

Postdoctoral Fellow

1999–2002 Space Telescope Science Institute, Baltimore, MD

Education

Ph.D Astronomy

1996–1999 University of Texas, Austin, TX
• Dissertation: *The Near-Infrared Properties of Compact Binary Systems*

MA Astronomy

1993–1996 University of Texas

BS Electrical Engineering, with High Honors

1989–1993 University of Texas

Selected Honors and Awards

- NASA RHG Exceptional Achievement Engineering-Teams award given to the HST Instrument Development for Servicing Mission 4 Team (2009)
- NASA Group Achievement Award to the HST SM4 Servicing Implementation Team (2009)
- University Co-Op Endowment Fellowship (1998–1999)
- David Alan Benfield Memorial Scholarship in Astronomy (1998–1999)
- William S. Livingstone Endowment Fund Fellowship (1997–1998)
- NASA/Texas Space Grant Consortium Fellowship (1997–1998)
- National Science Foundation Graduate Student Fellowship (1993–1996)

Research Highlights

- PI, Mega-MUSCLES Treasury Survey, a large HST program to characterize the energetic radiation environment in cool stars and its effects on exoplanet atmospheres and habitability (2017–)
- Project Manager, HET Dark Energy Experiment VIRUS spectrograph development (2016–)
- Project Manager, conceptual design study for GMACS optical spectrograph for the Giant Magellan Telescope (2016–)
- PI, conceptual design study for the Gemini High-resolution Optical Spectrograph (2011–2012).
- Project Scientist, HST Cosmic Origins Spectrograph (2005–2014).
- PI, conceptual design study for a High Resolution Optical Spectrograph for the Thirty Meter Telescope (2005–2006).
- Co-I, development of the first NIR laser comb for ultra high precision calibration to support radial velocity exoplanet searches (2006–present).
- Program Director of the NIC-FPS NIR camera instrument team for the Apache Point Observatory 3.5-m telescope (2004).
- Member of the instrument development team for the CoolSpec NIR spectrograph and the instrument refit team for Rokcam, the NIR imager, both for McDonald Observatory (1996–1999).
- Ongoing programs to characterize the structure and physical properties of accretion disks in compact binaries to: probe the accretion mechanism in disks at variable accretion rates, investigate the link between mass infall and outflows in winds and jets, and place firm limits on accreting black hole and neutron star masses to constrain formation and evolution models.
- Additional research interests in other fields, including probes of the atmospheres of transiting exoplanets using time-resolved UV spectroscopy and characterization of the UV radiation environments of exoplanet hosts.
- Interests in technology development to support future instrumentation, including development of dichroic trees for spectral sorting and multiplexing for cost savings and risk mitigation in large instruments.

Teaching Experience

- Taught AST 351/392J *Astronomical Instrumentation*, Spring 2016, UT Austin, a cross-listed upper level and graduate level lab instrumentation course
- Supervised graduate student J. Khargharia (Ph.D completion: Summer 2012).
- Taught ASTR 3520 *Observations and Instrumentation 2*, Spring 2011, CU Boulder, an undergraduate major lab course focusing on spectroscopy observations and data analysis.
- Teaching assistant at the University of Texas (1996–1997), including leading discussion sessions and instrument training at McDonald Observatory.

Membership and Service

- Space Telescope Science Institute User's Committee (STUC), 2016–present. Mikulski Archive for Space Telescopes User's Group member, 2014–2016.
- Member, American Astronomical Society.
- Past CASA Associate Director and CASA Fellow. Current CASA Affiliated Fellow. CASA is a research center serving 11 rostered faculty, 25 research scientists, 39 undergraduate and graduate students, and 14 staff. CASA has a \$2.1M yearly budget.
- Regular participation in refereeing manuscripts, serving on review and advisory panels for NASA and the NSF, etc.
- FUSE Observer's Advisory Committee (2003–2008) and various conference SOCs.

- Press activities: development of Cosmic Origins Spectrograph Early Release Observations and press release materials for the HST Servicing Mission 4 press conference; press interviews in support of press releases concerning observations of exoplanet atmospheres of WASP-12b and HD209458b.
- Community service including volunteering at the South by Southwest NASA education booth, speaking at Astronomy on Tap Austin, lecturing at University of Denver's Osher Lifelong Learning Institute and Ball Aerospace, participating in McDonald Observatory Board of Visitors meeting, CU Astronomy Day, star party support, etc.
- Invited participant in the Keck Institute for Space Studies workshop "Next Generation UV Instrument Technologies Enabling Missions in Astrophysics, Cosmology and Planetary Sciences."
- Creation of an atlas of all FUSE observations of cataclysmic variables, available from the HST MAST High Level Science Products archive.
