Cultural Evolution

Next Factor in Drake Equation: f

- f_c: fraction of planets with intelligent life that develop a technological phase, during which there is a capability for and interest in interstellar communication
- No significant biological evolution in last 40,000 to 100,000 years
- Evolutionary Takeover
 - Cultural evolution instead of biological
 - Much shorter timescale

Concepts

- 1. Timescales
- 2. Origin of agriculture
- 3. Extra-somatic information storage
- 4. Tools, technology
- 5. Interactions: written language, cities, taxes, classes, technology
- 6. Interest in communication
- 7. World view evolution
- 8. Coupling between technology and world view

Importance of farming

- The rise of civilizations all based on farming
- Understand origins of agriculture
- How likely to arise?
- Did it arise independently more than once?

Origin of Agriculture

10,000 years ago within 50-100 miles of Dead Sea Natufian culture - well built houses & signs of rank Harvested wild wheat, barley - used flint sickles, Stone mortars, and hunted

Climate becomes hotter, drier Overcrowding, shortages led to need for food source favors annuals over perennials shorter cycle larger seeds in husks - easier to collect Save, plant, harvest Evidence: seeds in settlements of Natufians successors Mutant: fatter, adheres to husk better
 ⇒ domestication, selection without forethought leads to rapid evolution of wheat and hunting decreases rapidly

Domestication (and farmers?) spread northward at ~ 1 km/year

Hole & McCorriston <u>American Anthropology</u> ~ April 1991

Agriculture leads to higher level political organization

		Band	Tribe	Chiefdom	State
	Religion				
	Justifies klepto- cracy?	no	no	yes	yes→no
	Economy				
ð	Food production	no	no→yes	yes → intensive	intensive
	Division of labor	no	no	no→yes	yes
	Exchanges	reciprocal	reciprocal	redistributive ("tribute")	redistribu- tive
					("taxes")
	Control of land	band	clan	chief	various
	Society				
	Stratified	no	no	yes, by kin	yes, not by kin
	Slavery	no	no	small-scale	large-scale
	Luxury goods for elite	no	no	yes	yes
	Public architec- ture	no	no	no → yes	yes
	Indigenous lit- eracy	no	no	no	often

A horizontal arrow indicates that the attribute varies between less and more complex societies of that type.

TABLE 14.1 Types of Societies				
	Band	Tribe	Chiefdom	State
Membership				
Number of people	dozens	hundreds	thousands	over 50,000
Settlement pattern	nomadic	fixed: 1 village	fixed: 1 or more villages	fixed: many villages and cities
Basis of relation- ships	kin	kin-based clans	class and resi- dence	class and residence
Ethnicities and languages	1	1	1	1 or more
Government				
Decision making, leadership	"egalitarian"	"egalitarian" or big-man	centralized, hereditary	centralized
Bureaucracy	none	none	none, or 1 or 2 levels	many levels
Monopoly of force and information	no	no	yes	yes
Conflict resolu- tion	informal	informal	centralized	laws, judges
Hierarchy of settlement	no	no	no→para- mount village	capital

Information

- Genes \longrightarrow 10¹⁰ bits (or less)
- Brains \longrightarrow 10¹⁴ bits

 \downarrow

 \longrightarrow 1400 cm³ in humans

Extra-somatic information leads to communication: information passed between individuals.

Allows **societies** to evolve.

Oral language	400,000?	Cooperative hunting?	
Oral historians	30,000?	Traditions and Lore	
Clay tokens	~ 8500 B.C.	Sumeria (record keeping)	
Clay tablets	~ 3000 B.C.	Business, Taxes	
Paper	~ 100 A.D.	China	
Printing press	1456 A.D.	Europe	
Radio	1895	Italy	
Television	~ 1936	First "strong" broadcast	
Computers	~ 1950's		
World-wide-web	~ 1990's		

Information and Intelligence

- Can we think of extra-somatic information as intelligence?
- Collective "intelligence" of the species
- But cannot be assimilated by any individual
- Collective knowledge does lead to ability to engage in interstellar communication

Tools and Technology

<u>Stone</u>

Oldowan Acheulian Mousterian Paleolithic Paleolithic Pottery Wheel 2.4 Myr
1.6 Myr

<u>Uniqueness</u>

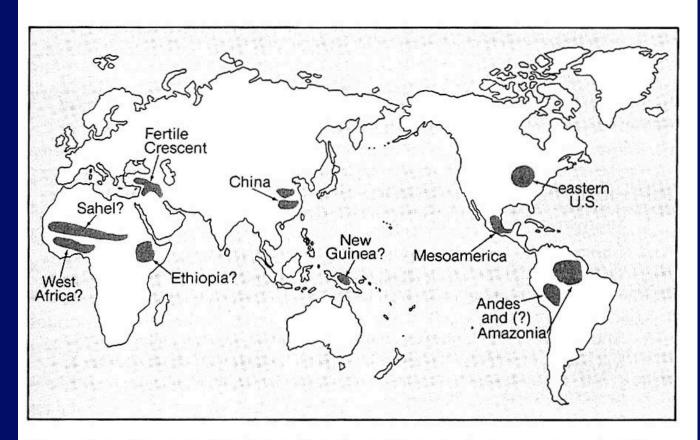

1. Agriculture

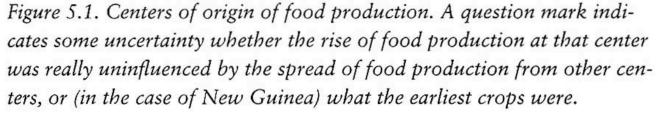

At least 5 (and maybe 9) independent origins Southwest Asia, China, Mesoamerica, Andes, Eastern U.S.

2. Written language
2-4 independent origins
Sumer, Mesoamerica, China(?), Egypt (??)
Only after farming

	chufa		

<u>Uniqueness</u>

- Centralized states, specialization
 Several independent origins
 Only after farming
- 4. Metal use
 Near East
 New World (Andes) mostly decorative
- Industrial Revolution, modern electronics (no test possible - all world in contact)

How does cultural evolution differ from biological evolution?

Does "natural selection" operate in cultural evolution?

If so, is technology an "advantageous trait"?

Is "cultural evolution" a valid description of "history"?
